SUMMARY

Frontend Developer fresher with hands-on experience building production-ready React applications. Strong foundation in component architecture, responsive UI design, and JavaScript (ES6+). Proficient in C and C++ with 300+ problems solved on LeetCode. Passionate about writing clean, maintainable code and crafting interfaces that users love. Actively seeking a frontend developer role to contribute and grow.

PROJECTS

Dev Interview Prep Board | *React, JavaScript, CSS Modules* Jan. 2026 - Mar. 2026

Live: dev-interview-prep.vercel.app/dashboard GitHub: github.com/hardiksingla0003/dev-interview-prep

- Built a structured prep board covering 4 core tracks — DSA, Frontend, System Design, and Behavioural rounds — with 15+ curated topics.
- Implemented topic-wise filtering and progress tracking, enabling users to mark completion across categories and monitor readiness.
- Designed a distraction-free UI with CSS Modules for component-scoped styling, improving focus and readability.

SaaS Analytics Dashboard | *React, Tailwind CSS, Recharts, Context API* Sept. 2025 - Nov. 2025

Live: saas-dashboard-ebon-five.vercel.app GitHub: github.com/hardiksingla0003/saas-dashboard

- Developed a full-featured analytics dashboard with 2 chart types (bar, line), KPI cards, and a responsive user management panel.
- Integrated Recharts for real-time data visualisation with fully responsive charts adapting across all screen sizes.
- Architected global state using React Context API, eliminating prop drilling across 10+ components and improving scalability.

Job Tracker | *React, Tailwind CSS, LocalStorage* April 2025 - June 2025

Live: job-tracker-app-livid.vercel.app GitHub: github.com/hardiksingla0003/job-tracker

- Built a Kanban-style tracker with 4 status pipelines — Applied, Interview, Offer, Rejected — tested with 20+ real job applications.
- Eliminated backend dependency by persisting all data with LocalStorage, enabling full offline functionality with zero data loss on refresh.
- Added per-application notes and deadline reminders, reducing missed follow-ups and improving job hunt organisation.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), C, C++, HTML5, CSS3

Libraries / Frameworks: React.js, Tailwind CSS

Developer Tools: Git, GitHub, VS Code, Vite, Vercel

Other: Data Structures & Algorithms, Web Development, Responsive Design

EDUCATION

CBS Group of Institutions, Jhajjar 2024
Bachelor of Computer Applications (BCA) Haryana, India

Vaish Public School, Rohtak 2020
Intermediate — Commerce Haryana, India

INTERESTS

Competitive Programming — LeetCode (300+ problems solved, focusing on Arrays, Strings, Graphs, Dynamic Programming etc.)

Building Side Projects — Developed 3 live React applications (deployed on Vercel) focused on real-world use cases like job tracking, analytics, and developer productivity.
